

The 3DMP® Cockpit – Everything at a glance

The **3DMP®** cockpit offers a web-based solution for keeping an eye on the production of high-quality, large-volume metallic components using **3DMP®** technology on **arc** machines.

The **3DMP®** cockpit allows the machine operator and the production management a comprehensive overview of the production and machine data of your **arc** machines.

Functions

- » Overview of machine data
- » Display of component progress
- » Gas and wire level indicator
- » Status display of the machine
- » Live video of the printing process
- » Statistical evaluation of component production
- » Statistical evaluation of operating data of the **arc** machines
- » Display of error messages and email notification
- » Individual adaptation of the cockpit to your needs

Using the 3DMP® cockpit on your smartphone, tablet or PC enables

- » Resource-conserving monitoring of production
- » Simple evaluation of component production
- » Detection of potential machine capacities
